

VSP's Eye Health Management Program[®]

Your Key to Wellness

VSP's Eye Health Management Program[®] is all about wellness. We focus on keeping our members healthy by giving them access to the best doctors in eyecare. And we use data to make sure their overall care is being coordinated. The result: Healthier VSP members mean a healthier bottom line for your organization.

For more information about how VSP's Eye Health Management Program can help you, contact your VSP representative.

Member Awareness Materials: We don't think ignorance is bliss. In fact, we believe it's bad for your health. So, we put a lot of effort into educating our clients and members about the importance of eye health. Explore our new Eyecare Discovery Center on vsp.com or receive information from us automatically. We'll give you what you want the way you want it.

Partnership and Data: We'll work with you to support your wellness efforts. Just consider our exam reminder. Members identified as diabetic receive a reminder letter from VSP when they're due for an exam. This takes one task off their list and makes managing their disease a little easier.

Exceptional Care: What happens when you see someone on a regular basis? You notice the differences, big and small. Our private practice network gives our members experienced and dedicated doctors. They get to know patients as unique individuals, and this can be lifesaving.
